

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

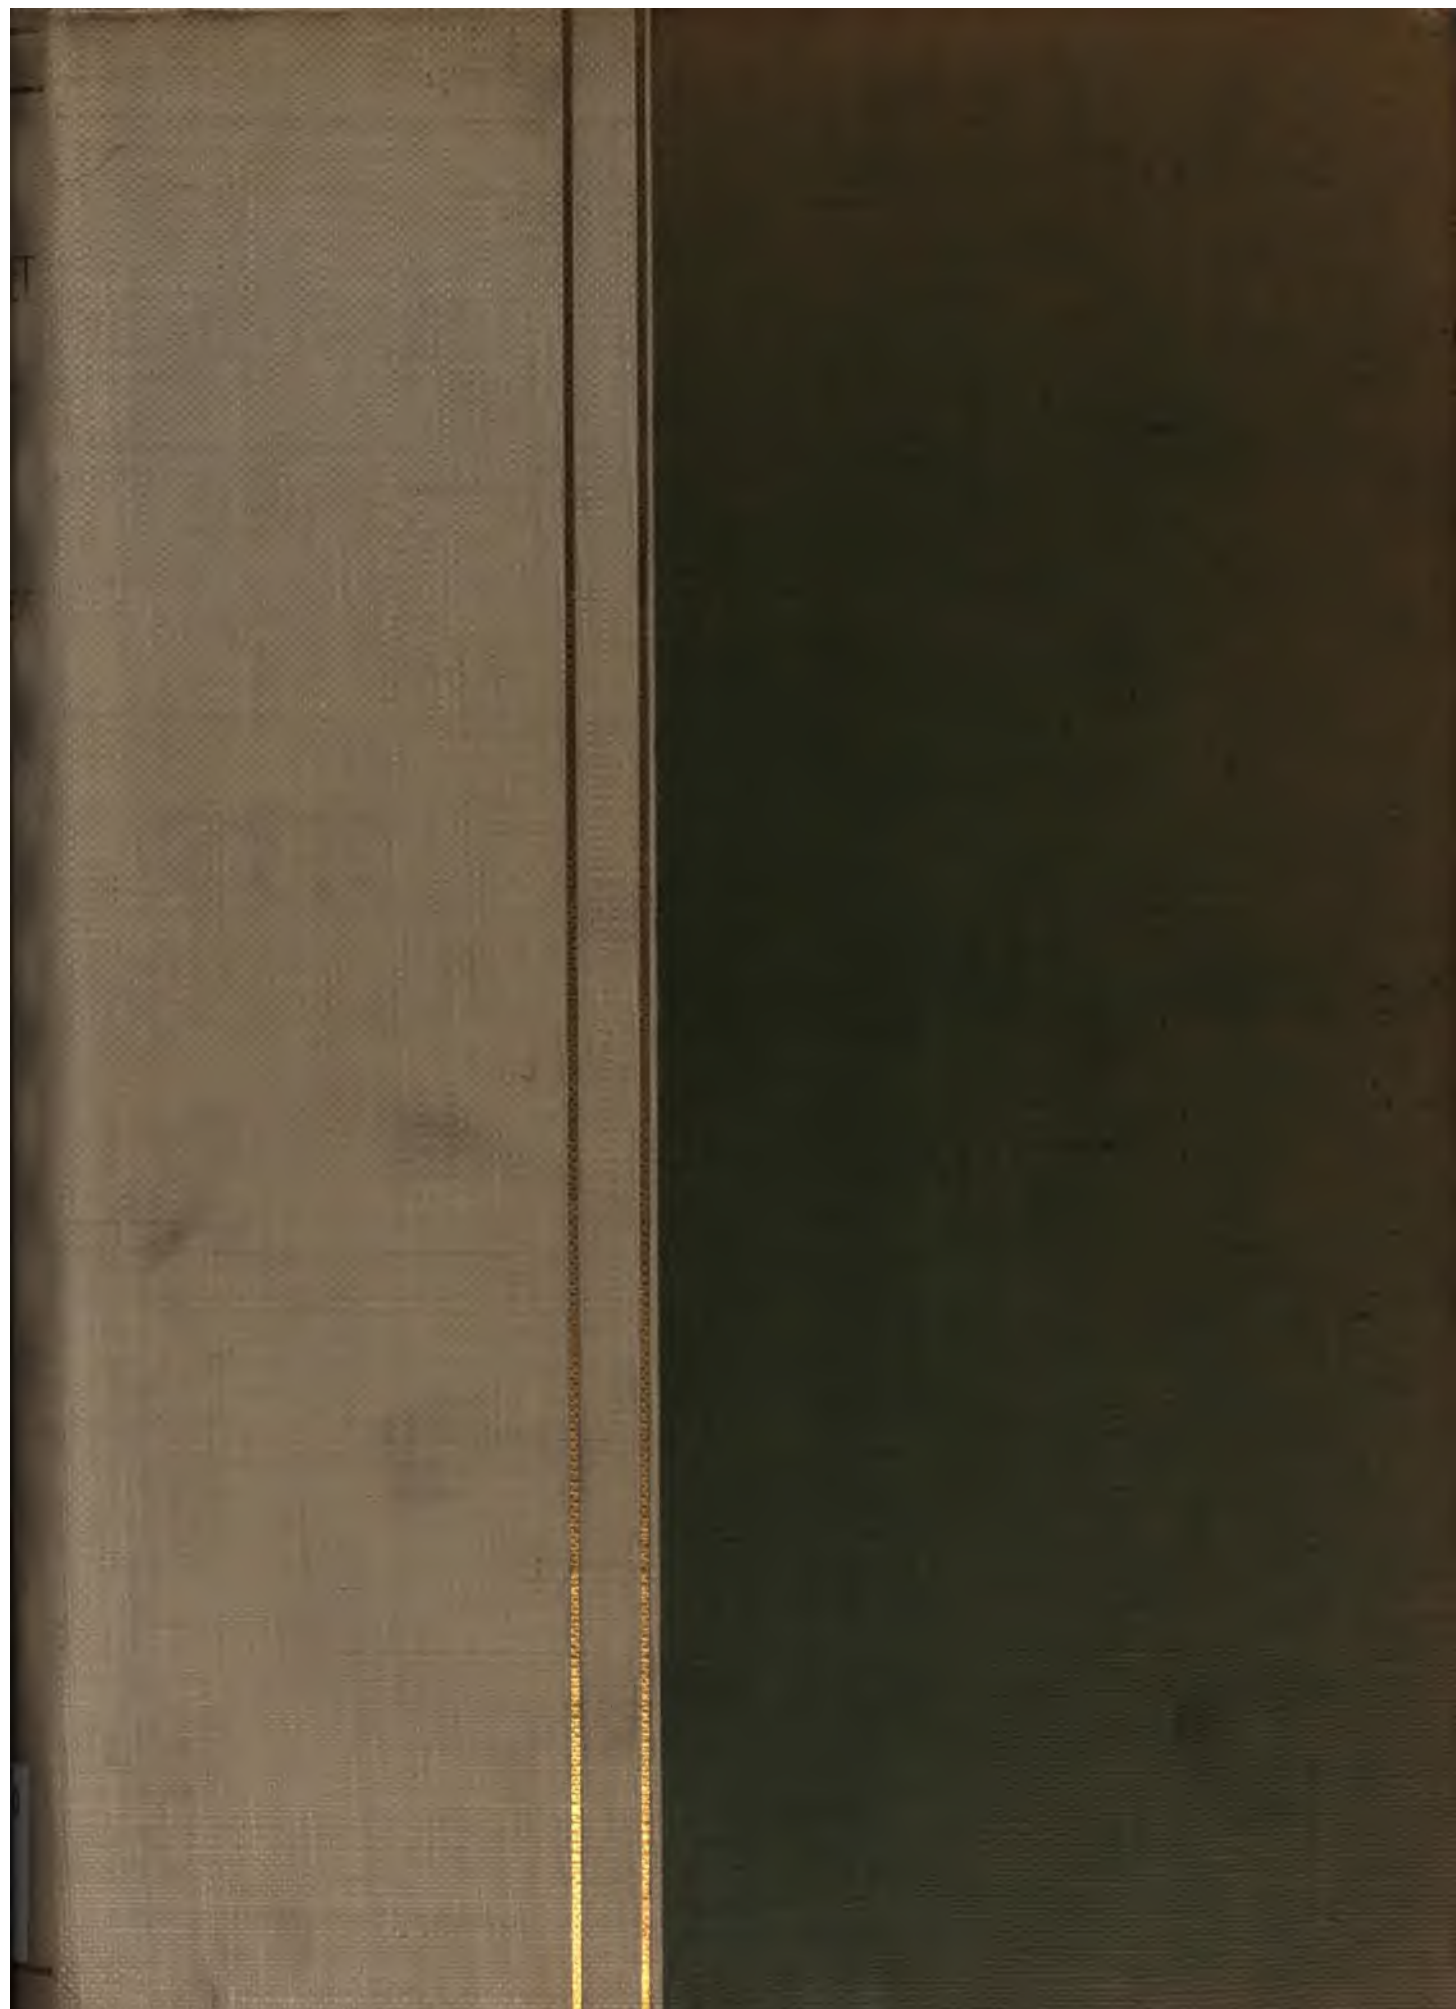

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

PREFACE.

WHEN I had progressed some way with this book, and had issued a Prospectus about it, I felt a little uneasy as to what was expected of *The Somerset Roll of Worthies, Unworthies, and Villains*.

Several works bearing somewhat similar titles, but relating to other Counties, had previously been issued, and consisted mostly of biographies lengthened out, in many cases, by well-known stories and anecdotes, which might be met with over and over again in biographical dictionaries such as are within the reach of all. From the first I saw no reason for putting this book together on these lines, and the general reader who purchases this book expecting to find such particulars herein will be disappointed. My idea throughout has been to give, in this first trial list, as many notable names as I knew of those who have been born within the County of Somerset, with dates and skeleton outlines attached to each. In this form I believe that the book may be useful to any one who is engaged in local research, because every principal parish in the County has sent up its 'tale of men,' whether they be worthies, unworthies, villains, or, what is most likely, composite characters 'of mingled yarn—good and ill together.'

PREFACE.

It will be noticed that my aim has been to be inclusive rather than exclusive, and, with regard to some names, I shall probably be asked what were my reasons for inserting them. I shall doubtless, also, have pointed out to me many conspicuous omissions. I say at once that any one who is so good as to take notice of this 'experimental list,' to point out errors of omission or commission, will have my best thanks. I have issued this list as 'tentative,' or 'trial,' because I wish to avail myself of the knowledge of others in any later edition of the book which may, I hope, be issued. At the moment of writing this preface, when the body of the book is printed off, I feel conscious of many improvements which I hope may be introduced at some future time—particularly the adding of bibliographical and iconographical notes to each entry.

In compiling this book I have sought out many valuable but obscure authorities, and to each I am more or less indebted; to name all such books would be impossible. To Mr. Arthur Pippett I am deeply grateful for the compilation of an *Index Locorum*, which I think requires no apology, and to Mr. D. Baxter for help throughout in revision and the verification of dates.
